Professional Summary

Computer Science Engineering student pursuing a Bachelor of Technology at Symbiosis Institute of Technology, Pune. Passionate about software engineering, full-stack web development, cloud computing, DevOps, cybersecurity, databases, and problem solving. Experienced in building practical academic projects using modern technologies while continuously expanding technical knowledge through hands-on learning. Seeking internship opportunities to contribute technical skills and grow as a software engineer.

Education

Bachelor of Technology (B.Tech)

Computer Science and Engineering

Symbiosis Institute of Technology (SIT), Pune

Batch: 2023 – 2027

Projects

IntelliShop — AI-Powered Smart E-commerce Platform

- B.Tech academic group project: built a full-stack e-commerce web application using the MERN stack with Generative AI capabilities.
- Implemented an AI Shopping Assistant for product-related user interactions and AI-powered product recommendations.
- Implemented AI Product Description Generation for e-commerce product content.
- Implemented an AI Review Summarizer that analyzes stored product reviews and generates a concise summary, key pros, key cons, and recommendation.

Fuel Station Management System

- Built a full-stack web application using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Implemented authentication, branch management, fuel tracking, customer feedback, and database integration.

Dockerized Angular Application

- Containerized an Angular application with Docker and Docker Compose.
- Configured separate development and production environments.

AWS Website Hosting

- Hosted and deployed a static website on an AWS EC2 instance.

Coursework

- Data Structures
- Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Cloud Computing
- Cyber Security
- Software Engineering
- Compiler Design
